When the Robinsons discover that the Jupiter 2 has a major fuel leak, they must act quickly to free the ship with any remaining power before the glacier collapses around them. Light is shed on Dr. Smith’s mysterious past.

ORIGINAL BROADCAST:
April 13, 2018
00:00:06,214 --> 00:00:09,050
[instrumental theme music playing]

00:01:20,371 --> 00:01:22,040
You didn't have to, you know...

00:01:23,500 --> 00:01:27,504
-I know. I just thought--
-Since you were leaving.

00:01:28,546 --> 00:01:32,425
Is it wrong to want to say goodbye to my sister?

00:01:34,761 --> 00:01:36,805
You know I'd bring you if I could.

00:01:36,888 --> 00:01:39,766
Let's not ruin things with a bunch of lies, Jess.

00:01:40,016 --> 00:01:42,143
-I'm just trying--
-To apologize?

00:01:43,394 --> 00:01:47,315
Why would I apologize for being a productive member of society?

00:01:47,398 --> 00:01:48,566
Oh, there's the girl I know.

00:01:48,650 --> 00:01:52,153
At some point, you have to take responsibility for your choices.

00:01:52,237 --> 00:01:55,115
Coming from someone who's never had to make any.

-Ah.

13
00:01:57,575 --> 00:01:59,744
Your college wasn't paid for?

14
00:02:00,829 --> 00:02:02,539
Dad didn't leave you the business?

15
00:02:02,622 --> 00:02:04,666
What? And he should have left it to you?

16
00:02:05,125 --> 00:02:06,918
You're a criminal, June.

17
00:02:08,378 --> 00:02:09,629
I've made mistakes.

18
00:02:09,712 --> 00:02:12,048
And I'm glad you recognize that.

19
00:02:13,383 --> 00:02:18,138
But they don't want mistakes in the new world.

20
00:02:18,221 --> 00:02:20,306
Well, thanks for the meal. Have a nice flight.

21
00:02:20,390 --> 00:02:21,558
Oh. Wait.

22
00:02:23,017 --> 00:02:28,314
I didn't ask you here to fight. I just... I just wanted to give you these.

23
00:02:29,816 --> 00:02:32,819
My house. My car.

24
00:02:34,154 --> 00:02:35,738
I'm not gonna need them anymore, so...
I don't deserve this.

No, no. Start fresh.

Be a better version of yourself.

[scoffs]

-I could live here?  
-[chuckles]

Yes.

I could drive your car?

-Wear your clothes?  
-If you'd like.

So I could just... I could just be you?

[exhales]

[gasps softly]

[thunder rumbles]

[wind howling]
00:04:53,418 --> 00:04:55,503
[indistinct chatter]

00:04:57,213 --> 00:04:58,047

00:04:59,424 --> 00:05:02,593
I was looking at it...
I was looking for anything to orient us.

00:05:02,969 --> 00:05:06,347
Anything familiar,
a planet or a constellation.

00:05:07,140 --> 00:05:10,935
But there was nothing, nothing--
There was nothing I recognized at all.

00:05:11,019 --> 00:05:12,812
[Judy] Okay. I don't understand.

00:05:12,895 --> 00:05:15,148
Exactly how lost are we talking about?

00:05:15,440 --> 00:05:17,567
Yeah, "Can't find your car
in the parking lot" lost?

00:05:17,650 --> 00:05:23,114
Well, if this is Earth
and this is Alpha Centauri,

we are, metaphorically, maybe,
a 600-year drive away.

00:05:23,948 --> 00:05:29,037
Maybe.

00:05:31,664 --> 00:05:34,000
Okay, so, not metaphorically...
Trillions of light years. It's, uh...

Look, if we got here, we can get back.

So... how do we get back?

Honestly, unless the Resolute is intact and can find us,

we might be stuck here.

Which is why I need everyone working on the problem.

-Okay?

We need to get comms operational.

Can't do that until we get the ship out of the ice.

-Judy, you need to get--
-Maureen.

What?

-I think we should take a breather.
-[Maureen] What?
[John] With the storm outside, there's nothing we can do,

and I think we'd all think a lot clearer after some rest.

-I am kind of tired.
-Yeah. I think we all are.

Just an hour, Mom. Then I'll be ready.

Okay.

Okay. I will wake everybody up after the storm.

Thanks, Mom.

[storm rumbling, ice crackling outside]

[John] With the storm outside, there's nothing we can do,

and I think we'd all think a lot clearer after some rest.

-I am kind of tired.
-Yeah. I think we all are.

Just an hour, Mom. Then I'll be ready.

Okay.

Okay. I will wake everybody up after the storm.

Thanks, Mom.

[storm rumbling, ice crackling outside]
Um, your family...

Unfortunately, I had to leave them behind.

Oh.

No, it's okay.

No husband, no kids. Makes it a little easier.

You're welcome to stay with us until...

[chuckles nervously]

[stammers]

Let me show you where you can store your stuff.

Doctor, engineer, soldier.

Sounds like I was rescued by the right family.

I wouldn't say we're...

-It's complicated.
Most families are.

00:07:51,512 --> 00:07:52,680
[beeping]

88
00:07:52,763 --> 00:07:54,849
-I'm a psychologist.
-Oh.

89
00:07:54,974 --> 00:07:57,560
I actually specialize in family therapy.

90
00:07:58,603 --> 00:07:59,812
You've come to the right place.

91
00:07:59,896 --> 00:08:03,858
Seriously, if there's anything I could do
to repay you somehow...

92
00:08:03,941 --> 00:08:06,027
Don't worry, we'll put you to work.

93
00:08:06,694 --> 00:08:09,405
Um, so, you can store your stuff in there.

94
00:08:09,572 --> 00:08:13,659
I'm sorry we don't have extra bunks,
but there's, uh, blankets.

95
00:08:13,743 --> 00:08:14,869
Please. I'll manage.

96
00:08:14,952 --> 00:08:17,079
Okay. See you in a bit.

97
00:08:17,163 --> 00:08:18,831
See you. Good night.

98
00:08:46,984 --> 00:08:48,861
[ice crackling against hull]
[sobbing]

[exhales]

[buttons beep]

[treadmill whirring]

[John] It's fine.
It's just the ice shifting.

I thought you needed the rest.

[sighs] I needed to relax.
There's a difference.

-[beeps]
-[treadmill powers down]

Hey, hon. Look...

what you went through out there
in the ice...

I know what that kind of fear
can do to your body.

More importantly,
what it can do to your mind.
So, if there's anything you need to--

-[beeps]

I'm fine, Dad.

[treadmill whirring]

Okay.

You do what you have to do.

-[treadmill stops]

[panting]

[wind howling]

[ice crackles against hull]

[slithering, low howling]

[screaming]

[gasping]

You okay?
[gulps] Yeah.

Bad dream?

Sort of.

Don't tell anyone, but I still get them from time to time.

And when I do, it helps to say what they were out loud.

It was nothing. Really. I'm fine.

[heavy footsteps]

[whispers] I thought you said it wasn't dangerous.

I'm gonna go back to bed.

Sorry.

Please don't mention anything to my dad.

-OH.

-About my nightmare.

I'm good at keeping secrets.
[loud rumbling]

-[Maureen shouting] Will?
-In here, Mom!

-[Smith] Uh...

Judy: What happened?

Smith: I don't know. It was like something just hit us.

Smith: It's the glacier. It's breaking apart.

-Judy: Wasn't me.

-Judy: Yeah. It wasn't her who totally saved everybody's life.

-Judy: If we don't get the Jupiter out of here, the whole thing's gonna collapse on us.

-Judy: The storm's over. It's all clear up there.

-Judy: Okay. Judy, pre-flight checklist.
Start with the thrusters.

00:14:17,314 --> 00:14:20,067
Penny, as we get closer to the surface,
I want you on the radio.

00:14:20,150 --> 00:14:22,653
Soon as we get the signal, we broadcast.
See if the Resolute--

00:14:22,736 --> 00:14:24,071
-What?

00:14:24,446 --> 00:14:25,865
We got a problem with the engines.

00:14:26,657 --> 00:14:27,575
What kind of problem?

00:14:28,325 --> 00:14:29,577
We don't have any.

00:14:36,584 --> 00:14:39,295
-[John sighs]
-It's heavy particulate from the storm.

00:14:39,378 --> 00:14:40,504
[Maureen scoffs]

00:14:41,297 --> 00:14:44,383
It's blocking the air flow
to the ventilation shafts.

00:14:49,471 --> 00:14:52,016
We're not going anywhere
until we clear this out.

00:14:54,768 --> 00:14:58,606
-I'll get Judy to come down and start--
-Wait, you think she's ready?
What do you mean, ready?

After what happened, you're not worried about her?

I'm worried about a lot of things, Judy's not one of them.

She'll pull through. She always does.

Well, maybe she'll pull through faster if we let her sit this out.

You know, give her time--

We don't have time, John. This part of the glacier is--

Unstable. Yeah, I know.

So is our daughter.

You really think you're the best judge of what she can and can't handle?

Look, I know you and the kids are this team, but...

[sighs] ...if I'm gonna be here, you gotta let me be here.
All right. Um...

Then how do you think we should handle our new guest?

Well, it seems to want to help us, but we don't know why it's here, or what--

I meant Dr. Smith.

Oh. Yeah, right. Um...

Well, if she qualified for Alpha Centauri,

she must be trained in emergency procedures,

so she should be fine.

Okay, aft engine cage.

We need to disassemble the contaminated thrusters.

So bag and heat-seal anything that needs to be on VC levels.

Are you okay?

Yeah. Sure.
How about you and I work together?
Okay, everybody else pair up.

-Dibs on Will.
-Seriously?

I want to spend quality time with my brother. What's wrong with that?

[Maureen] You guys are on detox.

Every piece needs to be wiped completely clear before it goes into the cage.

Guess you're with me.

Hey, you two, flush out the combustion chamber

so we don't re-circ any contaminants into the system.

Uh, John, does that sound okay?

Sure. Let's get this done.

Um... Okay.

Your robot's totally gonna do the work for us, right?
[Maureen] You go ahead. I'm gonna print a few replacement parts.

[Smith] Okay.

Is it safe?

I think that's the first time I've ever heard you ask that.

Well, you haven't been around to hear much of anything, so...

Hey, Jude?

It's okay if you don't want to come down here.

Mom always says four hands are better than two.

Doesn't she also say "too many cooks spoil the broth"?

Not one time.

[chuckles]

[Maureen shouts] John?
Speaking of which...

Hey. Everything okay?

Did you use the printer today?

No. Why?

A record came up.
Someone ran a program outside protocol.

Oh. So you automatically assume it was me?

Not assuming. I'm asking.

Okay, I did think about it,
but it wouldn't let me.

Jesus, John.

This isn't your commune on Alpha Centauri.
We need protection.

You know how I feel about weapons
in our house.

We already have one, Maureen.
It belongs to an 11-year-old boy and we have no idea how to use it.

-It's protecting Will.
   -[scoffs]

After everything that's happened, I'm relieved.

It's one less thing we have to worry about.

More importantly, if you didn't print something, who did?

We can skip the heat exchanger,

but let's pull the rotary coupling and the igniter.

[Smith] Okay.

I have to be honest with you about something.

And if it makes you regret taking me in, I wouldn't blame you.

I was actually gonna ask you.

How did you get past the restrictions?
00:20:08,290 --> 00:20:09,333
What do you mean?

00:20:10,459 --> 00:20:13,253
On the printer.
There's a firewall so people can't--

00:20:13,337 --> 00:20:16,298
I think our signals are crossed.
I haven't touched your printer.

00:20:18,508 --> 00:20:19,384
Oh.

00:20:20,385 --> 00:20:21,428
Sorry.

00:20:22,471 --> 00:20:25,724
-What was it you wanted to ask?
-It's just that, uh...

00:20:25,807 --> 00:20:31,104
my grasp of emergency training
isn't what it should be. Uh...

00:20:31,980 --> 00:20:35,108
Most of my prep-grouping
was occupational and not familial,

00:20:35,192 --> 00:20:37,736
and most of them
were more mechanically inclined,

00:20:37,819 --> 00:20:39,196
so I figured they would...

00:20:41,865 --> 00:20:43,867
[stammers] I'm sorry. I...

00:20:44,576 --> 00:20:46,536
I really should've paid more attention.
I just never imagined we'd end up--

Hey, it's okay. Nobody did.

Really? You seem like you've been preparing for this since you were a child.

Might explain why I didn't have a lot of friends.

-[Smith] Oh, stop it. -No, seriously.

[Smith] Look at you.

Successful, intelligent, beautiful.

You remind me of my sister.

I didn't have any siblings.

It would've been nice.

Someone to help with the chores, work the fields.

Am I standing next to a genuine farm girl?
In the flesh.

-Oh.

Not a lot of farm girls grow up to be aerospace engineers.

Well, when you wish upon a star...

-[sighs]

Makes no difference who you are

[laughs]

>alert beeping]

What the hell is that?

-[Maureen] What's going on?

-[John] Fuel level's dropping,

which is weird 'cause we're not using any.

Damage from the ice could've caused a leak.

I'll go check it out.

Keep an eye on the fuel. If it drops any faster, radio me, okay?
[Judy] Okay.

Me, too.

[ice crackling outside]

[sobbing]

Your mom said you'd know what to do with this?

Uh, yeah, that's fine. Just leave it there. Thank you.

What do you think about her?

Dr. Smith? I don't know.

-I don't know. I like her hair.
-That's how you form your opinion?

What about judging a book by its cover?

Whoever said that has never been to a bookstore.

You've never been to a bookstore. The last one closed in--
That's not my point.

[footsteps receding]

Hey, come back.

These parts aren't gonna clean themselves.

Yeah, thank you. Cool robot, Will.

[device beeping]

Well, if there is a fuel leak, it's not wide scale.

I'm gonna take a closer look.

[soft squeaking]

[soft slithering]

Thanks. So, new development.

Somewhere along the line, we started bleeding fuel.

[pants] What do we do?
[grunts] Same thing we've been doing, only a lot faster.

How much longer do you think we have?

Until we run out of fuel or until the glacier crushes us?

Seriously, why don't we all pile into that Chariot and get the hell out of here before it's too late?

Not a chance.

Maybe one or two people could survive in there for a bit, but not all of us. [grunts, panting]

I'm gonna take these to the kids and see how they're doing on those parts.

[Maureen] Okay, great.

[grunts]

[soft slithering]
[Will] Hey! What are you looking for?

Come on.

I thought you were supposed to listen to me.

[slithering continues]

[ship creaking]

What's... What's that sound?

-[slithering continues]

-[rumbling]

-[screaming]

[Will] No!

[faintly] Mom!

[Will pounds on door, screams]

[Penny] Will?

[Maureen] Will!

-Where's Will?

-I don't know.

What kind of danger?

-Mom, be careful!
-Why? What happened?

There's something on the ship.

[John] Okay. We definitely got a leak.

-I'm just, uh, trying to find the...
-[device beeping]

-Dad?

-Dad?

[Maureen] John?

John?

Joh-- Where's your father?
I... I think he's still in the basement. Why? What's wrong?

331
00:27:16,343 --> 00:27:18,345
Will said there's something on board. Some kind of--

332
00:27:18,428 --> 00:27:19,429
Some kind of what?

333
00:27:19,512 --> 00:27:22,349
Judy, you go find Dr. Smith. Penny, you stay here and--

334
00:27:23,058 --> 00:27:24,559
[screaming]

335
00:27:28,271 --> 00:27:29,814
Don't go downstairs.

336
00:27:30,273 --> 00:27:31,649
[panting]

337
00:27:31,733 --> 00:27:33,443
-Is it dead? -[sighs]

338
00:27:33,526 --> 00:27:35,528
-It is now. -[Penny] Okay.

339
00:27:37,405 --> 00:27:39,908
-What is it? -And why does it smell so bad?

340
00:27:39,991 --> 00:27:43,662
No idea, but it probably came in through one of the puncture holes from the crash.

341
00:27:43,745 --> 00:27:45,955
-Think it's been hiding the whole time? -Yeah.
Smells like it's been hiding in someone's butthole.

I've never seen anything like it.

[grunts]

Wait, where's Will?

It's okay. He's safe. The robot locked him in the closet.

Okay.

-Why?
-Why does he do anything?

I think that smell is fuel.

Makes sense. I found it in the water next to the tank.

[loud beep]

[automated voice] Warning. Fuel level at 52%.

Fuel's dropping. Faster now.
And I'm never having unagi again.

[sniffs]

Our fuel isn't leaking. It's being eaten.

Our fuel is a methane hybrid.

One of the compounds must be similar to its food source on the planet.

Any ideas how we get out of this one?

I need a bigger whiteboard.

Are those our fuel tanks?

Is anyone else never sleeping in here again?

Is it just me?

The Jupiters were built with two fuel tanks:

So far, our reserves are untouched.

If it stays that way,
we'll have enough to get out of the ice.

367
00:29:16,254 --> 00:29:19,048
So we need to trap those things and keep 'em out of the other tank.

368
00:29:19,132 --> 00:29:22,635
Yes, but the emergency settings will open the reserve tank.

369
00:29:22,719 --> 00:29:25,180
when the primary gets too low, and the only way to stop that

370
00:29:25,263 --> 00:29:27,807
is to turn it off manually at the source.

371
00:29:29,768 --> 00:29:33,021
So, um, we have to go down where the eels are?

372
00:29:33,104 --> 00:29:37,317
At the rate these things are going, we have about 15 minutes before we're dry.

373
00:29:37,901 --> 00:29:39,152
I'll handle the tank.

374
00:29:40,445 --> 00:29:42,113
You just get us ready to fly.

375
00:29:50,121 --> 00:29:51,456
Hey, Dad?

376
00:29:52,665 --> 00:29:53,958
-Yeah?
-I can help.

377
00:29:54,751 --> 00:29:56,878
Oh, it's okay. You sit this one out.

378
00:29:56,961 --> 00:29:59,964
No, seriously, I'm... I can handle it.

00:30:00,048 --> 00:30:02,342
I believe you, I do.

00:30:04,969 --> 00:30:06,429
I want you to believe it, too.

00:30:13,311 --> 00:30:15,772
[ice crackling against hull]

00:30:16,981 --> 00:30:19,692
-[breathing heavily]
-[ship creaking]

00:30:22,237 --> 00:30:23,530
I need to get in there.

00:30:24,447 --> 00:30:26,074

00:30:26,157 --> 00:30:29,369
I know it's dangerous.
It's gonna get a lot more dangerous

00:30:29,452 --> 00:30:31,412
if I can't get in there
to get a torque wrench.

00:30:37,293 --> 00:30:41,256
Will, can you tell your robot
to open the damn door?

00:30:41,339 --> 00:30:43,174
I've been trying. He won't listen.

00:30:48,972 --> 00:30:50,265

00:30:50,974 --> 00:30:51,808
[Judy] Yeah?
Judy, I need you to print me a torque wrench, 11/16".

-[Judy] That's gonna take-- I know.

-Mom said we've only got-- I know. Can you just do the best you can?

-What are you gonna do? [sighs]

I'm gonna buy us some more time.

[Will] I just...

I don't understand.

It's okay. It's not your fault.

He usually does what I want him to do.

Really?

Why do you think that is?

I don't know. Maybe it's his way of saying thank you.
For what?

For saving his life.

And now it's like we're connected.

Like he just knows what I want him to do.

Until now.

Maybe he's not listening to your voice...

because he's listening to what's inside.

What do you mean?

Every day, we have these little battles going on inside of us,

between what we want to do...

and what we need to do. And...

sometimes they can be very different things.

Level three access confirmed.
Level three access confirmed.
Level three access confirmed.

Morning.

[Smith] Good morning.

[automated voice] Level three access confirmed.

Level three access confirmed.

Excuse me, miss?

[automated voice] Level three access confirmed.

Hey, Jessica Harris, I've been looking for you.

Hey, come on, why aren't you stopping?

I'm sorry, I...

No, I'm sorry.
I just haven't been able to get away from Holly lately.

At this point, I don't even care if she finds out.

I just need to be with you.

Jesus, Jess. I thought you'd been avoiding me.

Can we go somewhere? I don't want anyone to see us.

Wait a minute.

[gasping]

Who the hell are you? Let's make a deal.

You don't tell anyone about me, and I won't tell your wife about your bad taste in women.

-[grunts]
-[beeps]

[man grunts]  
Stand clear.

[shrieks]

Air lock releasing in ten seconds.  
[man] You don't wanna do this.

[automated voice] Press to override.

[Nine, eight...  
Press the button.

[You don't want to do this to me.  
...seven, six,

[five, four, three...  
Just press the override button.

[...two, one.  
Please, override it!

[air lock releasing]  
[man screams, stops]

[Smith gasps]

[wind howling]

[ship creaking]
[Maureen] Salt for the eels.

Clever. Sixth grade biology?

It was actually Jimmy Sewerth's backyard.

You told me I couldn't play with him because anyone who tortures worms is destined to be a future serial killer.

Right. Well, Jimmy's not going to Alpha Centauri, is he?

Your dad thinks I expect too much of you kids sometimes. Do you?

Um... no.

I don't think you expect too much from us.

I just think maybe, sometimes, you expect too little from Dad.

[grunts] Hey, Judy. How's it going?
00:35:52,733 --> 00:35:54,819
Every time you ask, it goes faster.

465
00:35:54,902 --> 00:35:56,529
Okay, so not yet. [coughs]

466
00:35:58,406 --> 00:35:59,323
Are you okay?

467
00:35:59,407 --> 00:36:01,784
[grunts] Yeah, yeah. I'm fine.

468
00:36:04,829 --> 00:36:05,997
[exclaiming]

469
00:36:15,006 --> 00:36:16,007
Hey, Maureen.

470
00:36:16,090 --> 00:36:17,800
How are the engines coming along?

471
00:36:20,261 --> 00:36:22,180
-One down, one to go.
-Great.

472
00:36:22,263 --> 00:36:25,183
[grunting] Oh!

473
00:36:25,558 --> 00:36:27,768
I think some of these pieces are still back in the hub.

474
00:36:27,852 --> 00:36:30,646
-Do you want me to get them?
-Yeah. But be careful.

475
00:36:31,230 --> 00:36:32,315
Mmm-hmm.

476
00:36:34,650 --> 00:36:36,444
What... What are you doing?
I'm being careful.

[shouts]

[panting]

[exhales]

What are you looking at?

-[ice crackling against hull]

-[ship creaking]

[loud rumbling]

[gasps]

[grunting]

[gasping]

[automated voice] Surface unstable.

-Hey! You okay?

-Yeah. You?
[scoffs] Sure. Judy, you okay?

[panting]

Yeah.

But the torque wrench, it didn't print.

[automated voice] Auxiliary tank released.

[John] Don't worry. It's okay.

-John... -Judy, hold a sec.

When the Jupiter's weight shifted, it must've exposed the fuel sensor and released the reserves into the main tank.

[sighs] That's all the fuel we have left. Now they got it.

We can't wait. We gotta launch right now.

The last thruster's almost done. I just have to secure it.
So... Five minutes, tops.

[Penny, faint] Dad!

Penny?

[Penny] Dad, help!

-[Maureen] Penny! Something's wrong.

Whatever it is, I'm sure your family will--

-[Maureen] Where are you?

-[Will] Do something! Please! [John] Penny!

Why won't you listen to me?

Please, help them.

[John, distant] Penny, where are you?

I don't understand. Why won't he listen to me?
Shh. Deep breaths.

Fear is a powerful emotion, Will.

If you and that machine are as connected as you say,

he can sense that fear in you.

It's okay to be afraid.

To want to save yourself.

No, it's not.

Self-preservation is nothing to be ashamed of.

It's how we learn to survive.

[rumbling]

[gasping]

Help.

Dad!

Dad.

Hey, sweetie. You okay?

Been better.

Yeah, that's going around.

They're all around me. I can't move.

[screams] Oh, my God!

-Hey! Hey!
-No!

It's on my leg!

-[screaming] No! It hurts, Dad.
-Sweetie, it's okay.

They're not after you, they're after the fuel.

But the fuel is... It's all over me!

Sweetie, it's gonna be okay.
[Penny] How do you know?

Daddy?

-Daddy? Daddy, no!
-Go! Go!

Go to the hub. Come on! Come on!

- [panting] Are we gonna die in here?
- No.

Are you sure?
-'Course I'm sure.

You and me, we're survivors, aren't we?

Your family, they risked their lives out there in the storm to save me.

So I think it's time I risked my life to save them.

I don't understand. We're in here. How are you gonna get out there?
Your robot! Think about it. He only cares about putting you in danger.

He could care less what happens to me.

But I care what happens to you.

[chuckles]

I appreciate that, Will. I really do.

But one thing you'll learn about me... I can handle myself.

Come on, tell him.

Robot, I'm gonna need you to listen.

[printer whirs, dings]

[gasping]

[gasping]

[exclaiming]

Okay.
[yells]

[panting]

[chuckling]

Okay! Okay!

-My mom and dad, make sure they're--
- [Smith] I will.

- [Will] And my sisters--
- Don't worry.

I got this.

[ice crackling]

Warning. Fuel level at 25%. No reserves.

[automated voice] Ejection initiated.

This operation will compromise the structural integrity
of your residential transport vehicle.

Further aerial navigation will be eliminated.

29, 28, 27, 26...

Oh, come on.

Oh, no.

Come on!

[both grunting]

[both gasping]

Oh, thank God! [exhales]

Oh, thank you.

Okay, okay.
We're good. Let's go.

591
00:43:41,493 --> 00:43:42,661
You look terrible.

592
00:43:42,745 --> 00:43:44,038
Thanks. You, too.

593
00:43:45,372 --> 00:43:46,206
Okay.

594
00:43:47,541 --> 00:43:50,836
-Where the heck have you been?
-Figuring out how to save your ass.

595
00:43:50,919 --> 00:43:53,339
[chuckles] And she's back.

596
00:43:53,422 --> 00:43:56,258
[automated voice]
Warning. Fuel level at 15%.

597
00:43:56,342 --> 00:43:58,552
That's okay.
15% should be enough to get us out.

598
00:43:58,636 --> 00:44:02,348
-But what about those things?
-They should just burn up on ignition.

599
00:44:03,182 --> 00:44:04,600
Everyone hold tight.

600
00:44:06,518 --> 00:44:08,812
-[grunts]
-[engine powering down]

601
00:44:12,066 --> 00:44:14,234
-[Maureen] You've gotta be kidding me.
-What's wrong?

602
00:44:14,318 --> 00:44:17,571
-Nothing. We should be--
-[automated voice] Warning. Fuel at 10%.

603
00:44:17,655 --> 00:44:19,281
- No reserves.
- Everything checks out.

604
00:44:20,074 --> 00:44:22,785
[Penny gasps] We're gonna get crushed.
What do we do?

605
00:44:25,329 --> 00:44:27,122
- Dump the fuel.
- What?

606
00:44:27,206 --> 00:44:29,667
- Dump the fuel.
- We can't, we need--

607
00:44:29,750 --> 00:44:33,879
If those things are still in the tank, they might be clogging the intake valve,

608
00:44:33,962 --> 00:44:36,048
which means whatever fuel is left down there

609
00:44:36,131 --> 00:44:37,758
can't get into the combustion chamber.

610
00:44:37,841 --> 00:44:40,219
Ever drink fresh lemonade and get a seed stuck in your straw?

611
00:44:40,302 --> 00:44:41,970
[stammers] I know, Judy, it's just--

612
00:44:42,054 --> 00:44:45,432
Fuel level at 8%. No reserves.

613
00:44:45,516 --> 00:44:46,392
[Judy] Trust me.
There's still enough fuel in the lines to get us out.

Do it.

Fuel ejection system... activated.

Maureen, does this thing run on fumes?

I sure as hell hope so.

Dad?

Dad, watch out!

[grunts]

[engines sputtering]

It's okay, I got this.

[warning alarm beeping]
John?

00:46:36,418 --> 00:46:38,253
-[Penny] Dad?
-Brace yourselves.

00:46:43,967 --> 00:46:47,137
-[all yelping]
-[John grunting]

00:46:47,387 --> 00:46:48,514
[Maureen] You okay?

00:46:48,597 --> 00:46:50,265
[all panting]

00:46:53,560 --> 00:46:56,939
Does anybody have a mop? I may have barfed a little.

00:46:57,022 --> 00:46:58,565
[laughs]

00:47:02,361 --> 00:47:03,654
[Maureen] It's beautiful.

00:47:09,576 --> 00:47:11,537
Nice bit of flying you did.

00:47:12,746 --> 00:47:14,039
It's a good crew.

00:47:18,460 --> 00:47:20,295
[Penny] We've got comms. They're live!

00:47:20,379 --> 00:47:23,465
-[man] This is Mark on Jupiter 22...
-[Maureen] There are other survivors.

00:47:23,549 --> 00:47:26,218
-[man 2] We have established...
-[Maureen laughs] We're not alone.
00:47:26,301 --> 00:47:28,136
  -[Mark] Standby.
  -[Maureen laughs]

00:47:28,637 --> 00:47:34,476
  -[radio chatter continues]
  -Wait a sec. Will. Will. Will!

00:47:48,699 --> 00:47:49,825
  Will?

00:47:53,620 --> 00:47:54,621
  Mom!

00:48:02,212 --> 00:48:04,381
  I'm so sorry I wasn't there to help.

00:48:05,257 --> 00:48:06,550
  It's okay, sweetie.

00:48:07,134 --> 00:48:08,969
  You would've if you could've.

00:48:36,330 --> 00:48:39,499
  [Penny] Guys! Guys, come here! Quick!

00:48:39,583 --> 00:48:41,251
  -What?
  -[radio beeps]

00:48:41,335 --> 00:48:45,714
  [man] This is Captain Radic broadcasting from the Resolute.

00:48:46,089 --> 00:48:49,718
  We've taken on heavy damage, but are still operational.

00:48:50,302 --> 00:48:53,055
  Life support systems have been stabilized.
Navigational capabilities are being assessed.

Wounded are being tended to.

Most importantly, we believe, in time, we'll be able to get back on course toward our new home on Alpha Centauri. [screams]

Thank you, thank you, thank you, thank you!

[laughing]

-[Radic continues indistinctly on radio] -[Judy] Mom, Mom, Mom!

I know, baby.

[Radic] And for those of you who are unable to return,

know that as soon as repairs are completed,

we will find you.

Did you really think we wouldn't find you?
Do you think you're the first person who thought they could fake their way into a new life?

June Harris. Quite a career.

Breaking and entering. Possession of stolen goods.

Identity theft.

Now it seems you've graduated to the big time.

We have you on camera taking that man's life.

I was defending myself. It wasn't my fault.

You don't actually believe that, do you?

Well, Miss Harris, I have some good news and some bad news.

The good news, we haven't set up a system of justice yet.

No courts. No jail.
Bad news?

We haven't set up a system of justice yet,

which means I can do
whatever the hell I want to you.

[door opens]

Sir, we've had a breach.
What kind of a breach?

I don't know. They're asking for you
in the control room.

Sit tight. We are not done.
Not even close.

-[door closes]
-[alarm blaring]

-[explosions in distance]
-[people screaming faintly]

[thudding mechanical footsteps]

What is it?

What are you doing with that?
00:51:56,780 --> 00:51:57,656
I don't want it.

687
00:52:01,326 --> 00:52:04,663
Wait. Did you make it?

688
00:52:05,705 --> 00:52:07,374
With our printer?

689
00:52:08,834 --> 00:52:09,668
Why?

690
00:52:09,751 --> 00:52:12,587

691
00:52:12,671 --> 00:52:14,798
Danger? From what?

692
00:52:18,426 --> 00:52:19,845
That was just a bad dream.

693
00:52:20,887 --> 00:52:24,474
Look...
I know you don't want to hurt me...

694
00:52:26,810 --> 00:52:30,355
but if we're gonna be friends,
you can't hurt anybody.

695
00:52:31,356 --> 00:52:32,399
Ever.

696
00:52:34,192 --> 00:52:35,360
Do you understand?

697
00:52:39,656 --> 00:52:40,657
Good.

698
00:53:16,484 --> 00:53:18,403
[dramatic music playing]
